A Tafa Fuel of 20% is charged for every profit a user makes using any of the Tafabot auto trading bots. This fee becomes 10% for all manual bots.

The minimum fuel balance required is trade-profit specific. Fuel balance must be enough to cover the 10% or 20% fee required on a target profit from a trade capital before a trade session is activated. For instance, if a trade using \$2000 capital aims to make \$100 profit after 5 strategy period or rounds of trade, then a user must have a minimum fuel balance of \$20 (i.e. 20% of \$100 profit) before this trade can be activated.

Regardless of these, all fuel deposits are treated as prepaid rewards and instantly distributed to uplines once deposited. As such, they are non-reversible and non-refundable.
